National Flood Safety Awareness is March 11-15, 2019.

“Turn Around, Don’t Drown”

Meteorologists at the National Weather Service watch the weather to try to warn people well in advance of the flooding so they can save lives and property. Flood Watches and Warnings, along with Flash Flood Watches and Warnings, are issued for a specific area when flooding conditions are likely or are already occurring. The National Hurricane Center will also issue Storm Surge Watches and Warnings for areas of the U.S. that have the potential for damaging storm surge from a tropical cyclone.

National Flood Safety Awareness is March 11-15, 2019.

National Hurricane Preparedness Week is May 5-11, 2019.
